

Ethertronics At CTIA 2010!

Las Vegas March 23 – 25, 2010

Ethertronics, the leading provider for high performance embedded antennas, will be at CTIA showcasing its latest product line-up of both passive and active antenna solutions.

We cordially invite you to visit our private suite to view antenna demos and meet with Ethertronics staff to understand how our award winning & patented Isolated Magnetic Dipole™ (IMD) technology will enable the next generation of high performance and small form factor wireless devices.

Some of the exciting new products that will be shown include:

- *Active multi-band antennas including support for LTE 700MHz bands*
- *The world's smallest combo BT/GPS antenna in a 10x3mm size package*
- *High performance Standard Penta-band Cellular antennas for M2M applications*
- *Embedded media antennas for Mobile TV and FM*
- *Small footprint, high efficiency, ISM band (315/433/868/915MHz) antennas*

To request a meeting at our suite in the Las Vegas Hilton, please coordinate with your local Ethertronics representative.

We look forward to meeting you at CTIA!
