Subject: Kyocera AVX — EU Deforestation Regulation (EUDR) statement on natural rubber

Kyocera AVX Components Corporation confirms that we do not use natural rubber (Hevea-born natural latex or other naturally sourced rubber) in the manufacture of our parts and components placed on the EU market to the best of our knowledge. This includes finished parts, sub-components and any raw or compounded natural-rubber inputs as described in the EUDR product scope. This statement covers products manufactured, assembled or supplied by Kyocera AVX and its production sites unless explicitly superseded by a newly signed declaration from the company.

We make this declaration in line with the requirements and intent of the EU Deforestation-Free Products Regulation (EUDR, Regulation (EU) 2023/1115). We are aware that the EUDR requires operators placing relevant commodities and products on the EU market to ensure those goods are deforestation-free and legally produced, and to keep appropriate traceability and due-diligence documentation when relevant commodities (including natural rubber and products derived from it) are in scope. Kyocera AVX does not place natural-rubber commodities or products containing natural rubber on the EU market from our production processes to the best of our knowledge.

We understand the importance of protecting the environment and are committed to ensuring that our products are sustainable and environmentally friendly.

If, at any time, Kyocera AVX sources a component or material that contains natural rubber as defined in the Regulation or listed in Annex I, we will:

1. Notify customers and update our public statements accordingly; and
2. Ensure supplier-provided EUDR evidence and due-diligence documentation (geolocation, traceability and supplier declarations) are available to demonstrate compliance before placing such items on the EU market, in accordance with the EUDR evidence and recordkeeping obligations.
