

VERTICAL ORIENTATION OF KYOCERA AVX CHIP CAPACITORS ON STRIPLINES

To minimize microwave parallel resonant effects, chip capacitors should be mounted on the microstripline in the orientation shown below. In this configuration, called Vertical Orientation, the capacitor plates are perpendicular to the microstripline conductor.

You may order a HN or HS style capacitor having narrow microstrip leads such that the capacitor plates are in the orientation shown in the illustration.

Sales of KYOCERA AVX products are subject to the terms and conditions contained in American Technical Ceramics Corp. Terms and Conditions of Sale (KYOCERA AVX document #001-992 Rev. B 12/05). Copies of these terms and conditions will be provided upon request.
